

Project Manager

If you're passionate about leading projects that make a real-world impact and thrive in a dynamic, innovative environment, this is your chance to make a mark. As our Project Manager, you'll be at the forefront of our mission, driving key initiatives to our growth and success in the sustainable energy sector.

About Lithium Harvest:

Join us at Lithium Harvest, a leader in sustainable lithium extraction. Our innovative approach leverages cutting-edge technologies to transform oilfield wastewater into valuable lithium compounds, contributing to the green transition for the electric vehicle and energy storage markets. We are committed to environmental responsibility, reducing waste, and minimizing our carbon footprint.

Position Overview:

As a Project Manager at Lithium Harvest, you will play a vital role in leading and executing a range of significant projects. Your primary responsibilities involve spearheading new project developments, enhancing processes, and driving both supplier cost reduction and quality improvement programs. A crucial part of your role is to ensure the successful launch of projects by leading efforts at selected project locations and actively participating in negotiations with suppliers and collaborators.

You will oversee the entire lifecycle of a project, from initiation to delivery, managing interdepartmental activities to guarantee completion on time and within budget. Reporting directly to the CTO, your role extends to managing a multidisciplinary engineering team, interfacing with external suppliers, fabrication units, and field teams.

A significant focus will be on maintaining project schedules, managing engineering budgets, and ensuring the quality of engineering deliverables. Effective communication with the leadership team is essential. Your initial projects will primarily be in the US and Europe, requiring experience managing complex and location-diverse initiatives.

Key Responsibilities:

- Manage projects from start to finish, ensuring timely and within-budget completion.
- Implement and monitor project plans, resolve operational problems, and minimize delays.
- Coordinate activities of outside contractors, ensuring integration and service standards.

- Estimate costs, resources, and time for project phases, ensuring met targets.
- Regularly report project status within and beyond the project team.
- Supply chain security
- Negotiations with possible suppliers
- Comfortable in the role of project manager, leading and motivating international specialists.

Qualifications:

- Degree in Engineering or related field.
- 5+ years of experience in project engineering/management.
- Proven track record of successfully managing large-scale projects.
- Proven ability in managing multi-team engineering projects.
- Strong communication, organizational, planning, and time management skills.
- Proficiency in project management tools like MS Project.
- Ability to lead internal and external project meetings.
- Team player with a positive attitude and strong ethical values.

What We Offer:

- An inspiring work environment focused on innovative solutions for sustainable lithium extraction.
- Flexible working hours
- Opportunities for professional growth and development.
- A collaborative culture that values each member's contribution towards our shared goals.
- Competitive compensation and benefits package.
- Nice office in Aalborg with lunch arrangement

Location: Aalborg, Denmark (some travel may be required)

Requirement: Must be residing in Denmark.

Application Process: Interested candidates are invited to submit their resumes and cover letters via career@lithiumharvest.com. Please include any relevant project experience or skills that align with Lithium Harvest's mission and technologies.

Deadline for Applications: We understand the value of time and are keen to bring talented individuals on board as quickly as possible. Therefore, we are reviewing applications on a rolling basis and encourage you to apply immediately. Don't miss this opportunity to advance your career with Lithium Harvest!

Contact Information: For further inquiries, don't hesitate to contact Paw Juul, CTO, at +4551568869 or pj@lithiumharvest.com.

Join us at Lithium Harvest, where your contributions can help shape the future of sustainable lithium extraction and environmental stewardship.
